HUSSIEN MOHAMED ROSHDY

Senior Flutter Developer | Senior Mobile Engineer

Giza, Egypt | Open to Remote & Relocation | +20 111 093 6946 | hussienmohamed4390@gmail.com

LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior Flutter Developer with 6+ years of professional experience building, scaling, and maintaining production iOS and Android applications across fintech, banking, food delivery, payments, and real-time systems. Experienced in end-to-end mobile architecture and delivery using Flutter/Dart, Clean Architecture, SOLID principles, reactive state management, REST/GraphQL APIs, WebSockets, MQTT, native Android/iOS integrations, automated testing, CI/CD, performance optimization, and App Store / Google Play releases. Previously contributed to Talabat mobile products serving millions of users across MENA and currently responsible for key architectural and engineering initiatives at Tarmeez Capital. Experienced in technical leadership, code reviews, mentoring, production issue investigation, and cross-functional product delivery.

EDUCATION

Bachelor of Engineering - Communication Department | Canadian International College (CIC), El Sheikh Zayed, Egypt | Sep 2013 - Jun 2018

TECHNICAL SKILLS

Mobile: Flutter, Dart, Dart 3, Null Safety, iOS, Android, Cross-Platform Development
Architecture: Clean Architecture, Layered Architecture, MVVM, SOLID, Design Patterns, Dependency Injection, OOP, Melos
State Management: BLoC, Provider, GetX, Riverpod, Redux, Reactive State Management
APIs & Integration: RESTful APIs, GraphQL, WebSockets, MQTT, Dio, Retrofit, JWT, OAuth, Platform Channels, Third-Party SDKs
Firebase & Analytics: Firebase, Crashlytics, FCM, Firestore, Firebase Analytics, Amplitude, Braze
Testing & DevOps: Unit, Widget & Integration Testing, TDD, CI/CD, Azure DevOps, Codemagic, Fastlane, GitLab, GitHub, Git
Storage & Reliability: SQLite, Hive, SharedPreferences, Offline Handling, Flutter DevTools, Performance Profiling, Crash Triage, Root-Cause Analysis
Payments & Release: Tap Payments, Apple Pay, Secure Data Handling, App Signing, Google Play Deployment, App Store Deployment

PROFESSIONAL EXPERIENCE

Software Engineer - Mobile (Flutter) | Tarmeez Capital

Riyadh, Saudi Arabia - Remote | Aug 2024 - Present

- Own key architectural and engineering responsibilities for the Tarmeez Capital fintech mobile application, delivering scalable and maintainable Flutter/Dart solutions across the software development lifecycle.
- Design and develop mobile features using Clean Architecture, layered architecture, dependency injection, Dart null safety, and scalable reactive state-management patterns.
- Developed secure checkout and payment experiences integrating Tap Payments and Apple Pay, alongside JWT/OAuth authentication and secure mobile-data handling.
- Built and integrated real-time financial functionality using WebSockets and MQTT, connecting Flutter applications with backend financial-data and authentication services.
- Reduced client-side API response handling time by 30% through optimized asynchronous workflows, Dart best practices, and Flutter DevTools performance profiling.
- Built and maintained CI/CD pipelines using Azure DevOps, Codemagic, Fastlane, and Melos, automating builds, testing, app signing, and releases and reducing release-cycle time by 40%.
- Integrated Flutter with native Android/Kotlin and iOS/Swift functionality using platform channels and third-party SDKs.
- Developed unit, widget, and integration test suites covering critical application flows, achieving 80%+ test coverage across core modules and integrating automated testing into CI pipelines.
- Collaborate with backend, QA, design, and product teams within Agile/Scrum workflows and contribute to architectural discussions, code quality, estimation, release readiness, and production issue resolution.
- Mentor junior engineers on Flutter best practices, architecture, state management, widget lifecycle, testing, debugging, and maintainable mobile-development standards.

Senior Flutter Developer | Bank of Jordan - Side Project

Side Project / Project-Based Engagement

- Contributed to the development of a banking-focused mobile application using Flutter and Dart, with an emphasis on maintainable, production-ready mobile code.
- Built and refined reusable UI components and application flows while following clean architecture and scalable mobile-development practices.

- Integrated mobile features with backend services and RESTful APIs, including data handling, error states, and asynchronous application flows.
- Applied structured state-management patterns and collaborated on debugging, code quality, and application reliability across the project.
- Worked within a security-conscious financial-services environment, supporting stable mobile functionality and consistent user experiences across iOS and Android.

Software Engineer - Mobile (Flutter) | Talabat

Giza, Egypt | Oct 2019 - Aug 2024

- Contributed to the development, scaling, and maintenance of Talabat production food-ordering and delivery applications serving millions of users across MENA on iOS and Android.
- Built customer-facing functionality across restaurant discovery, ordering, checkout, payment, order management, and delivery experiences using Flutter and Dart.
- Developed real-time order-tracking functionality using WebSockets and dynamic restaurant-listing experiences using Flutter and GetX state management.
- Translated UI/UX designs and wireframes into responsive, adaptive, production-ready Flutter interfaces across multiple mobile form factors.
- Reduced production application crash rate by 25% through advanced debugging, Firebase Crashlytics analysis, root-cause investigation, Flutter DevTools profiling, and reliability improvements.
- Improved application responsiveness and offline behavior using caching and local-storage strategies with Hive, SharedPreferences, and SQLite.
- Integrated REST APIs and GraphQL services while collaborating closely with backend engineers on mobile/backend contracts and application workflows.
- Integrated Firebase Cloud Messaging, deep linking, Amplitude, Braze, analytics instrumentation, and third-party SDKs to support customer engagement, product analytics, and production diagnostics.
- Worked with native Android and iOS capabilities through platform channels and native integrations and participated in performance optimization, production troubleshooting, and release readiness.
- Collaborated within a cross-functional team of 15+ engineers and participated in peer code reviews using GitLab and CodeRabbit.

SELECTED PRODUCTION EXPERIENCE

Talabat - Food Ordering & Delivery Platform | Flutter, Dart, iOS, Android, REST, GraphQL, WebSockets, Firebase, Analytics

Large-scale production mobile platform serving millions of users across MENA, covering restaurant discovery, ordering, checkout, payment, order management, real-time tracking, analytics, and production reliability.

Tarmeez Capital - Fintech Mobile Application | Flutter, Dart, Fintech, Payments, Apple Pay, REST, WebSockets, MQTT, Kotlin, Swift, CI/CD

Major mobile architecture and engineering responsibilities involving secure financial functionality, checkout and payment flows, real-time financial data, authentication, native integrations, automated testing, CI/CD, and mobile-store releases.

EARLIER EXPERIENCE

Help Desk Support Specialist | Amazon Egypt | Giza, Egypt | Feb 2019 - Oct 2019

IT Help Desk Administrator | Orange Egypt | Giza, Egypt | Jun 2018 - Feb 2019
